

KEY-MASTER
Pushing the limits for your security

Junior +14

The **KEY-MASTER Junior +14** key cabinet has been carefully designed to simplify management of your keys and maximise security. Each key lock is located in a separate compartment, preventing other users from accessing or understanding your keys.

The intuitive Android terminal makes it easy for users to loan and return keys. Moreover, managing the cabinet is effortless. By linking the cabinet to the **KEY-MASTER Cloud** software, you can manage the cabinet from any location in the world. In addition, management via the Android smartphone application is also possible.

With these advanced features, the **KEY-MASTER Junior +14** key cabinet offers not only convenience and efficiency, but also a high level of security for your key management.
